

## Angelique Custom Creations Classes 2017

### Metalsmithing 101

In this introductory class become familiar with studio tools, equipment and safety. Learn foundation metalsmithing skills including sawing, filing, forming and polishing while making a pair of earrings and designing and making a pendant.

### Metal Etching for Jewellery

Learn how to create figural designs, patterns and textures on a metal surface using safe non-toxic and low toxic etching processes. Learn how to transfer original art and clipart images onto metal using photo-etching techniques.

Students will also perform basic metalsmithing techniques such as disc cutting, doming and roll printing while creating a pair of earrings and a master texture plate for roll printing.

### Metal Patination

Learn how to colour and prematurely age metal jewellery using DIY mixed and premixed solutions.

Students will perform texturing techniques such as roll printing and hammering while making pieces of jewellery to be patinated.

### Riveting

Learn how to use various types of rivets to connect pieces of metal while making a pendant. Students will also learn stamping and texturing techniques while performing this project.

### Wire Jewellery

Learn how to perform traditional textile techniques such as coiling, braiding and weaving in wire. Beginner, intermediate and advance levels taught.
